holistic market intelligence analysis for Industry Solutions Canada
- Sep 2007 – Sep 2010 **Cooperative Student – Siemens AG**
Bachelor-Thesis: Holistic market and competitive intelligence for the solution business of intralogistics projects

Tanja Schindler

Futurist | Inspirator - Strategist

The Bachelor of Engineering in Industrial Engineering and Management supports me in understanding complex problems as well as applying key business concepts. The dual system of my studies allowed me to gain early work experience and to apply theories in real business cases. After gaining four years of work experience as Product Manager and in Corporate Strategy, I decided to deepen my knowledge through a double degree masters of MBA and Strategic Foresight. My studies focused on futures thinking, system mapping as well as design thinking. I worked as foresight consultant, group facilitator, and research analyst. Further, international experiences have strengthened my empathy for different cultures and understanding of diverse teams. Today, I am a professional futurist, consulting in the areas of Strategic Foresight, Strategy, Innovation, Design Thinking and Leadership.
