Tanja Schindler - Futurist

Speaker Profile

Hi! I'm Tanja and a passionate futurist who loves to inspire people through my positive and energetic nature. Through my global experience in Foresight, I see the world from various angles and will transform your point of view to see the world through different eyes. My focus in the futures field lies in highlighting the advantages of futures thinking and developing a futures mindset in the areas of Transformation, Strategy, Innovation, and Leadership. I will invite you to explore Foresight to create a purposeful organization that shapes its own future and matters to your employees and customers. Get future ready and start your journey with me.

MY PORTFOLIO. A selection of my current work.

INSPIRING SPEECHES

Conferences - Panels - Round Tables

- 📍 Unlock your Futures Mindset – Why we need to rethink transformation

- 📍 Sustainable Cities of the Future – Human-centric and community driven

- 📍 New Work– Why your company should focus on your employees first

EMPOWERING WORKSHOPS

Team Building - Employee Development

- 📍 Tackle the Digital Age of Transformation– How to rethink change

- 📍 Positive Change– How to rethink uncertainty

- 📍 Future-Ready– Why everyone can create a future-ready organization

ENLIGHTENING PROJECTS

Business Culture Transformation

- 📍 Future Culture – How Futurism will light up your business culture

- 📍 Futurism & Innovation - adding futures thinking to your innovation space

- 📍 Future meets Strategy – Fast and agile future-based strategizing

Research & Speaking

THE FUTURE OF UNIVERSITIES & EDUCATION

The concept of universities needs to change and has to become a place of idea exchange. Whereas companies can provide on-the-job learning, universities need to prepare for critical thinking and entrepreneurship.

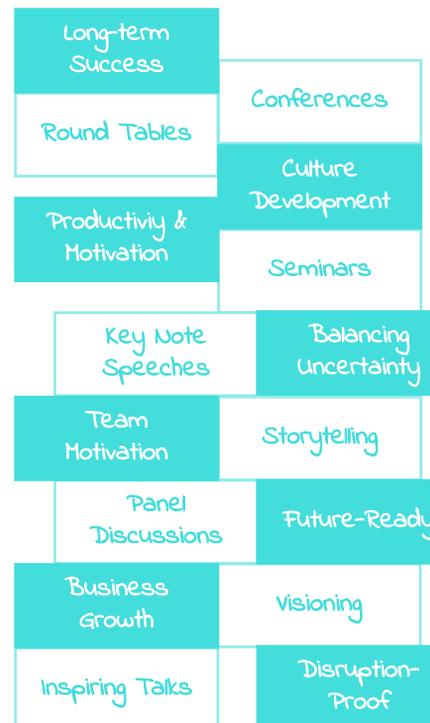

THE FUTURE SMART CITIES & URBANISATION

Cities are not only becoming smart in the future, the way how we live and communicate will change as well. However, a balance between humanity and technology is desirable where community driven and sustainable cities evolve.

NEW MOBILITY & AUTONOMOUS DRIVING

The age of cars as status symbol has passed as they have become a new way of transportation. With driverless cars, carpooling and car-sharing a new area of mobility has arrived and cities as well as rural areas need new infrastructures.

ABOUT MY PASSION.

My perspective on the future

In traditional Foresight, we deal with future trends and scenarios, but this is just not enough to cope with transformation and change. Instead of seeing the future as a passive field that we try to predict or prepare for, we will create your own or your organization's pathway into a desirable future. (Digital) Transformation and Demographic Change needs more than adapting to innovative technology or new work models; it requires a different way of thinking, a new mindset that empowers you and your team to think outside the box and to thrive from change.

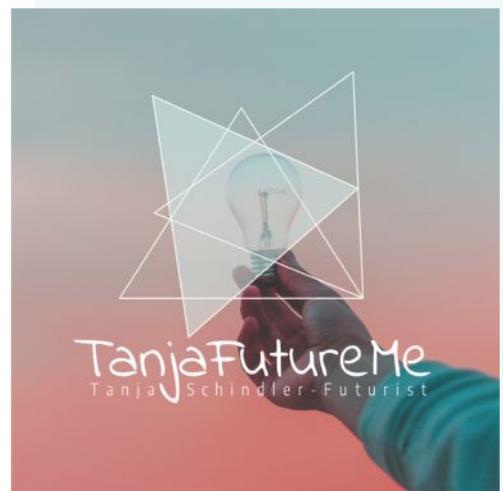

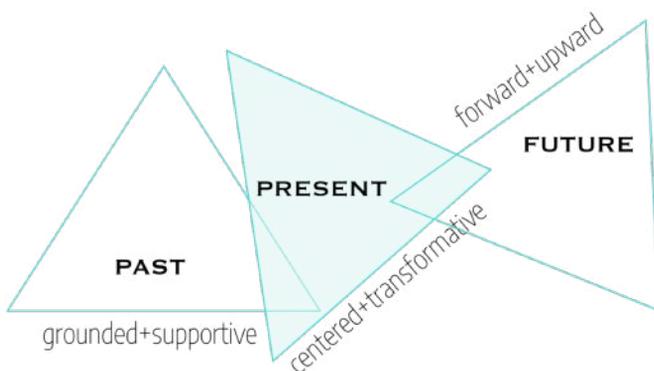

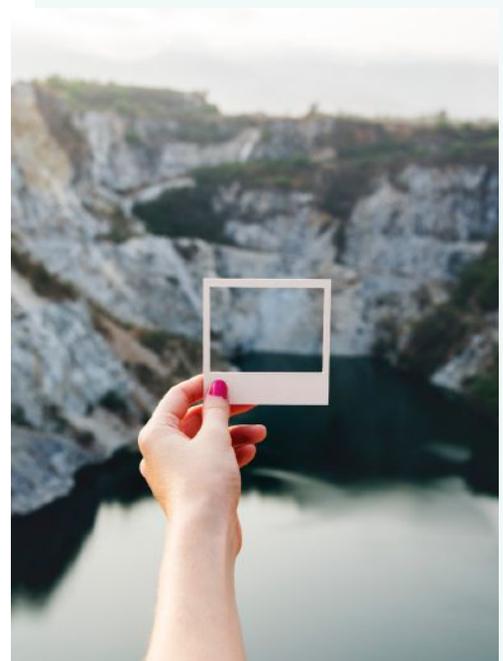

Together we will redefine your company's strategic outlook by understanding emerging social and technological developments and their impact on your company. Through questioning your current perspectives on strategy and innovation we will create a purpose-driven organization that will inspire and empower your employees to proactively drive change in the present. We will actively begin to shape the future in a direction where you meet the burning needs of your customers. Finally, you will learn how your daily decisions can amplify change and transformation to reach your future goals.

ABOUT FORESIGHT.

Why it supports transformation

By applying Foresight methods, we will challenge your and your team's current perceptions of the past, present and the future, before we begin to build a desired future to fulfil a purposeful and problem-oriented discourse. The future of how we work is changing and a future-oriented approach is essential to attract talents, to motivate your team and to provide meaningful, high-quality and sustainable goods and services to your customers.

FUTURE meets STRATEGY

Playground for strategic people.

- ✓ Fast Scenario Building
- ✓ Agile Future-based Strategizing

In this project, we face the reluctance to embrace future developments by applying Foresight methods in a fast way to improve future-oriented decision-making as well as define new strategies that are agile and empower change & transformation. Link the future to your current activities and understand how to create your own pathway into the future by applying new Foresight methods that focus on future relevance and present decision-making.

FUTURISM & INNOVATION

Think innovation anew. Add futures thinking.

Reach for new horizons by adding futures thinking to your innovation space. This new approach includes future-oriented methods to create products and services that are sustainable, meaningful and future-ready. In a diverse team we will create a future vision that guides your business to set your own direction and to choose the right pathways. An unlocked mindset that is welcoming change will lead to a new pool of innovative ideas.
